

21G CATHETER

The VERSA-KATH® is a small 21g directable catheter designed for physicians using a smaller gauge epidural needle.

INCLUDES ACCESSORIES

The VERSA-KATH® comes with the award-winning Stingray® connector and E-Cap stylet. Also offered as a convenient Mini-Kit.

DESIGNED FOR SMALL GAUGE NEEDLES

The VERSA-KATH® is best used with small gauge epidural introducers, such as Epimed's 18g RX-2™ Coude®.

The VERSA-KATH® is a one-of-a-kind 21g spring-wound catheter with a soft atraumatic open-end for enhanced flexibility for target epidural injections. This catheter can be confidently directed through a shear resistant patented 18g RX-2 Coude®. Preferred by physicians for cervical and S1 injections.

FEATURES:

- Small gauge steerable catheter
- Constructed of ultra durable, surgical grade stainless steel
- Catheter coating extends past atraumatic tip for enhanced tensile and break strength
- Kink and collapse resistant
- Radiopaque
- Styletless
- Open end for directional delivery of medication
